

Strawberry Lemonade is a sativa dominant hybrid that took first place in High Times' 2015 Denver Cannabis Cup as "Best Sativa Concentrate."

Supposedly a cross between Strawberry Cough and Lemon OG, the exact genetics are unknown. Tangy flavors and aromas coupled with a heady onset and complementary body effects make this a favorite for a day off. Enjoy Strawberry Lemonade throughout the day, but don't plan too far ahead. This strain can be whimsical and intensely relaxing.

Sativa: 60% Indica: 40%

THC: 16-22%

Rx: Stress, cramps, chronic pain.

Dominant terpene: Myrcene
